

MIKI - 2500 Automatic Faucet High Body

MIKI - 2500 感應水龍頭 高身

Characteristic :

- **Water Saving:** water comes out once your hands approach its sensor eye and stops when you draw your hands back.
- **Hygienic:** since hands do not touch faucet to wash, it is convenient, hygienic and able to avoid bacterial mutual-infection effectively.
- **Power Economical:** Lithium batteries can last 1 year based on 100 cycles per day.
- **Self-Regulation:** it will adjust inducing scope according to the size of basin & using environment to avoid adjusting inducing scope in frequency.
- **Power lack protection:** Light flash indicate low battery; Solenoid valve shut off automatically when battery is very weak.
- **Water saving protection:** Flow stops automatically when something is still in the sensor area after 60 seconds.

Technical information:

Power supply	DC: 6V, Lithium batteries , installed before leaving factory; AC : 220v-6v
Recognize range	80mm automatically
